Gary -

Here's the weekly summary for Delta Shipyards. Yesterday, Robert and I met with John Halk and Todd Thibodeaux at the site to conduct a walk through. I think Houma had 2.5 inches of rain the day before. The drainage ditches were completely full. The area is heavily overgrown and will need a lot of clearing before we can conduct a sampling mission. We were able to hack our way to each pit and collect a few photos. While we were there John Halk mentioned that LDEQ just completed oversight of an in-situ remediation project call Bayou Trepagnier. It's a bayou near Norco, LA that received wastewater and stormwater from the old Shell Oil facility. Similar COCs as Delta Shipyards (SVOCs/PAHs and metals). He provide the AI# so that we can review the work plan.

Enjoy Orlando.
